

PREPARATION

Apply one coat of our premium primer :
"Fond de Teint" (or "Restart" for non-absorbant
surfaces) using a roller.

Drying time : 4 hrs

1ST COAT OF SPARKL

Mix the SPARKL paint well in its can. Apply one
thick coat using a large brush. Apply in criss-cross
movements all over your surface.

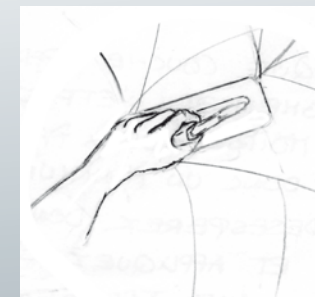

Drying time : 4 hrs

**2ND COAT OF SPARKL**

Once again mix the SPARKL paint in its can and
apply the 2nd coat in exactly the same manner as
the 1st coat.

**USING THE SPARKLE SPATULA ON FRESH PAINT**

Before the sparkl paint actually dries (5 to 10
minutes) use our Sparkl Spatula or a stainless
trowel to create the velvet effect.
Holding the trowel at an angle to your surface,
lightly crush the wet paint onto itself using
straight gestures in all directions.

THE FINAL EFFECT OF OUR SPARKL PAINT DEPENDS VERY MUCH ON THE WAY THAT LIGHT, NATURAL OR ELECTRICAL, IS REFLECTED FROM IT. SPEND SOME TIME PLACING YOUR DIRECTIONAL LIGHTS DIFFERENTLY TO DEFINE THE BEST REFLECTIONS THE PAINT GIVES AND THE IDEAL POSITION FOR YOUR LIGHTS.
